

Handheld.Gate 'Print@Gate'

For mobile ticket dispensing with personal service, equip your staff with Handheld.Gate 'Print@Gate'.

Stay flexible

- Do your clients want service upon entry? Make your staff location-independent and provide mobile ticketing.
- Ensure that your clients always have up-to-the-minute information with ticket printing directly from the "mobile gate". The size and layout of the tickets can be adjusted individually.

New revenue opportunities

- With Print@Gate you can use the opportunity for collaboration by adding advertising or information to your tickets.
- Sell your seats as soon as they become free, e.g., for different matches at tennis tournaments.

The innovative ticket dispenser

- Ideal for guests with booking confirmation, Handheld.Gate and the mobile printer Print@Gate generate tickets and receipts.
- The instant ticket printing function onsite saves time and resources.

Very easy to operate

- Deploy your personnel on a short-term basis: Requires no long training curve, because the tickets and receipts are generated at the touch of a button.
- The intuitive user guidance with accurate pictograms and acoustic signals makes operation easy.

Features

- Flexible, mobile printer solution to complement mobile ticket checking
- Improved customer service thanks to printable additional information or issuing of replacement tickets
- Flexible custom design of print labels
- A second bar code can be printed on the ticket, e.g. for further permission checks within the accessed area
- Support of different sized print media
- Device can be used also while off-line; optionally, additional receipts can be printed without an on-line connection to the central server
- Wide range of applications - printer works even under adverse weather conditions (rain, very low or very high temperatures)
- Device is very easy to operate
- Interactive application can be installed in various languages
- Suitable for mixed operation of Handheld.Gate Print@Gate and Vario.Gate Print@Gate

Possible applications

- Issuing of replacement tickets straight at the gate
- Issuing of tickets for additional on-site access checks (e.g. within an area)
- Last-minute definition of ticket details, e.g. sector, area, seat number
- Multiple sale of seats
- Providing of visitor information at the gate
- Issuing of accreditations
- Advertising
- Customer sweepstakes
- Coupons
- Issuing of validations (e.g. parking)
